Rotterdam, 6 augustus 2026

Dear Ms. Bommart, dear Diane,

Thank you for your request. You need an outplacement partner that works in English, understands the realities of international development professionals, and delivers concrete results within a fixed budget. That is exactly what we do.

CareerHandling

For more than 24 years we have guided people and organisations through outplacement and career transitions. With a unique combination of experienced coaches, registered psychologists, entrepreneurs and the agentic AI of our partner AcmeBrainCorp, we deliver programmes that actually produce results.

Our approach is defined by personal attention, realistic job marketing and a success rate of more than **96%** (participants find a new, suitable role within three months).

At CareerHandling you do not choose a standard outplacement agency, but a committed partner that guides people with respect, structure and modern tools.

Why this proposal is built for your situation

You are 34, hold a Master's degree, and worked as Food System Expert (Market Systems Development and Public-Private Partnership) at Cordaid. You are a non-Dutch-speaking expat. Your sector is shrinking because government budgets are shifting from development to defence. You live near Eindhoven and want either to stay in international development or move into roles that use the same skills closer to home.

That combination requires three things most Dutch outplacement firms handle poorly: full English delivery, real insight into transferable skills from market systems and PPP work, and a realistic view of the Dutch and international labour market for expats.

CareerHandling provides all three.

Specifically we will:

- Map your Market Systems, PPP and Food Systems expertise onto concrete target roles (international NGOs, consulting, agribusiness, sustainability, policy advisory, private-sector partnerships).

- Produce an updated/optimised English CV, LinkedIn profile and application materials that pass both ATS filters and human readers in international organisations.
- Identify local and hybrid opportunities in the Eindhoven / Brainport region that value systems thinking and partnership experience.
- Use AI-driven matching to surface vacancies weekly that fit your profile and location preference.
- Help you prepare for interviews with organisations that still hire in development, and with employers outside the traditional aid sector.

Our proposal – two clear options within your budget

Your budget is €5,000 excl. VAT. Both options stay inside that ceiling. We recommend Option 2 because the AI layer shortens the search and improves targeting in a niche that is currently contracting.

Option 1 – Outplacement Standard

A solid, coach-led programme:

- Personal intake and tailored career plan (including transferable-skills analysis)
- Full optimisation of CV, LinkedIn profile and application letters (English)
- Support with applications, networking and labour-market orientation
- Regular coaching sessions (online or hybrid)
- Job-hunting support

Price: €3,495,- (excl. 21 % VAT)

Option 2 – Outplacement Premium with AI support (recommended)

Everything in Option 1, plus:

- AI-driven vacancy matching and labour-market analysis focused on international development and adjacent sectors
- Tailored vacancy lists per week (international + Eindhoven-region / hybrid)
- Interview preparation and mock sessions
- AI-assisted optimisation of CVs, motivation letters and LinkedIn outreach
- Structured analysis of transferable skills from Market Systems Development & PPP into new career paths
- Practical training in effective AI use for job search
- Two months of aftercare after placement

Price: €4,999,- (excl. 21 % VAT)

Logistics

All sessions are delivered in English. The programme can run fully online or hybrid (online + face-to-face in the Rotterdam or Eindhoven area). We handle scheduling. The trajectory starts as soon as you accept and can be phased if needed.

Practical details

The full amount is invoiced upon acceptance of this proposal.

Travel costs, if any, are charged at €0.50 per kilometre.

Terms

All prices are in euros, exclusive of VAT.

Deliveries are subject to our standard terms and conditions.

Validity

This proposal is valid for 30 days from the date above.

Diane, you need a partner that treats the contraction of the development sector as a fact, not a talking point, and that turns your specific expertise into a marketable profile for the next role — whether that role is still in international development or closer to home in the Eindhoven region. That is the work we propose to do.

We look forward to your response.

Kind regards,
CareerHandling BV
